Learning Level

Learning Level	Description
Introductory	Designed for those new to Workday or new to specific feature areas. These sessions highlight basic use cases, features, functions and benefits.
Advanced	These sessions are meant for experienced users with a deep understanding and knowledge of Workday features, configurations and integrations. These sessions may be more technical and cover more-detailed use cases.
All Levels	These sessions are relevant to anyone and include Workday best practices, customer case studies, new features and business processes.

Track

Choose sessions from multiple tracks to create a personalised learning experience. Each track also includes sessions on how you can experience continuous value through deployment, change management and feature adoption – as well as sessions that focus on specific industries.

Track	Description
Finance	See how you can use Workday Financial Management to gain complete business insight, respond to change and find the best path toward profitability.
Human Resources	Discover how Workday Human Capital Management helps you gain complete visibility into your global workforce and deliver a better user experience to keep your people engaged and help them grow.
IT	Dive in and explore the technology innovations that power our applications. Topics include architecture, security, user interface, productivity, reporting and analytics, machine learning, Workday Cloud Platform and more.

Payroll and Workforce Management	Explore our holistic approach to workforce management and how you can use Workday Payroll, Workday Time Tracking and Workday Absence Management to streamline processes, reduce risk and empower your employees through self-service.
Product Suite	Learn how adopting our entire product suite (Workday Financial Management, Workday Human Capital Management, Workday Payroll and more) helps you dramatically improve operational efficiency and achieve better business outcomes.
Industry Trends and Business Outcomes	Learn how organisations are using technology and industry best practices to gain real-time insights, streamline processes, make better decisions and drive results for the bottom line.
