Lead Data Analytics Consultant
Bardess Group
Who am I?

Trey Smith
Lead Data Analytics Consultant

• 7 Years Qlik Experience
  o OEM Partner
  o Customer
  o Elite Solutions Provider

• Qonnections 2017 Speaker
  o Creating UI Templates for QlikView

• Blog: WhereClause.com
Objective

To help you answer these three questions:

• What is the difference between Qlik Sense® and QlikView®?
• How does this affect our users?
• How does our development process change?
What is the difference between QlikView® and Qlik Sense®?
What is the difference between QlikView® and Qlik Sense®?
How will this affect our users?

- This is not a version change, this is a tool change.
How will this affect our users?

• Growing Pains

Be cognizant that some change management will be required.
How will this affect our users?

• Learning to tackle analytics with a different mindset.
• Self Service
• Augmented Analytics
How does our development process change?

- The transition is easier than you think.
How does our development process change?

• Going past the box

With the open APIs, if there is not a feature you need out of the box, you can accomplish it by building your own, using open source extensions, or paying for supported third party extensions.
How does our development process change?

- Focus on Data Governance: Master Items

You are providing power to the users through trusted data models and vetted expressions.

- Reusable building blocks:
  - Dimensions
  - Measures
  - Visualizations
How does our development process change?

- Focus on Data Governance: Security Rules & Data Connections
  - Share access to source data programmatically.
How does our development process change?

• Focus on Data Governance: Data Connections
  • Share access to source data programmatically.
