- Technical Writer for AUGIWorld
- Autodesk Certified professional and Expert Elite Member
- Owner of CADproTips.com
- If I can teach you one thing and make you think then I have done my job
Summary

With the plan and production tools in Civil 3D you can automate the process of creating plan and profile sheets quickly.

You can create multiple plan and profile sheets, sections on multiple layouts, and tying it all together in a sheet set ready for publishing your deliverable.

Most importantly, you’ll be able to bring back value to your employer and the knowledge to help you excel within your field.
Objectives

• Templates

- Civil 3D (Imperial) Plan and Profile.dwt
- Civil 3D (Imperial) Plan only.dwt
- Civil 3D (Imperial) Plan over Plan.dwt
- Civil 3D (Imperial) Profile only.dwt
- Civil 3D (Imperial) Profile over Profile.dwt
- Civil 3D (Imperial) Section.dwt
